Slacker and RIM Partner to Enable Slacker to Provide Personal Radio on BlackBerry Smartphones

SAN DIEGO, Calif. – September 11, 2008 – Slacker, Inc. and Research In Motion (RIM) (Nasdaq: RIMM; TSX: RIM) today announced plans for Slacker to provide a free Slacker Personal Radio application, exclusively for BlackBerry® smartphones, that will enable listeners to hear their favorite Slacker radio stations wherever they go - even when not connected to a wireless network. The application will be previewed this week at the BlackBerry booth (booth 614) at CTIA in San Francisco and was highlighted in today's CTIA keynote address by Jim Balsillie, Co-CEO of RIM.

The Slacker application will provide BlackBerry smartphone users in the U.S. with a robust, high-fidelity personalized music discovery and listening experience pulling from over 100 expertly programmed Slacker stations, over 10,000 artist stations or their own custom-created stations.

Slacker's unique caching technology will allow listeners to access Personal Radio stations using their BlackBerry smartphones without ever having to manage playlists, research new artists or deal with complicated software again. The Slacker application for BlackBerry smartphones will work with Free Slacker Basic Radio and Slacker Premium Radio.

"From the inception of Slacker, our mission has been to give listeners the music they love wherever they are," said Dennis Mudd, CEO of Slacker. "Working with RIM allows us to provide our listeners with added flexibility and convenience to make the most of the Slacker Personal Radio service."

"BlackBerry smartphones have evolved with advanced communications and multimedia capabilities to become modern lifestyle devices that are used in highly personalized ways and the free Slacker Personal Radio application is a great example of a mobile entertainment application that can add value to the user's mobile experience in a meaningful way," said Jim Balsillie, Co-CEO of Research In Motion.

Slacker Personal Radio, available online at www.Slacker.com, enables listeners to personalize over 100 professionally programmed stations or create, edit and share their own Personal Radio stations. Slacker listeners also have easy access to artist profiles, album reviews and cover art within the Slacker Web Player, on Slacker Personal Radio Players and soon on BlackBerry smartphones.

###

About Slacker, Inc.

Slacker is the world's first Personal Radio company offering "Your Radio Everywhere." Slacker allows music lovers to play highly personalized music online at the Slacker web site or on the go with Slacker Personal Radio players. Visit www.slacker.com for more information.

About Research In Motion (RIM)

Research In Motion is a leading designer, manufacturer and marketer of innovative wireless solutions for the worldwide mobile communications market. Through the development of integrated hardware, software and services that support multiple wireless network standards, RIM provides platforms and solutions for seamless access to time-sensitive information including email, phone, SMS messaging, Internet and intranet-based applications. RIM technology also enables a broad array of third party developers and manufacturers to enhance their products and services with wireless connectivity to data. RIM's portfolio of award-winning products, services and embedded technologies are used by thousands of organizations around the world and include the BlackBerry® wireless platform, the RIM Wireless Handheld™ product line, software development tools, radio-modems and software/hardware licensing agreements. Founded in 1984 and based in Waterloo, Ontario, RIM operates offices in North America, Europe and Asia Pacific. RIM is listed on the Nasdaq Stock Market (Nasdaq: RIMM) and the Toronto Stock Exchange (TSX: RIM). For more information, visit www.rim.com or www.blackberry.com.
